

"The Federal Communications Commission (FCC) is now considering making changes to the way FM radio is heard in your community. Advocates of a new broadcast service known as Low Power FM (LPFM) are proposing to expand this service in a way that would allow the new LPFM stations to take priority over current FM translator service. We are bringing this to your attention because Air1 is a national and regional broadcaster with many local FM translators used to bring the Positive Alternative Air1 signal to communities across the nation. What this means to you is that you may lose your local Air1 FM Radio service!"

I listen to Air1 regularly and if you do what you are planning, then I won't have a good Christian radio station to listen to!

I would like to ask that you please not do it. I had heard that you people wanted to ban Christian radio, but I thought it was a hoax; now I know it is real! We will not stand for this. If you do this, then Christian everywhere are going to have to contact their Senators, and Representatives about your actions. Thank you.
